Software Developer & Language Learning Enthusiast

Education

Universitat Autònoma de Barcelona

BACHELORS DEGREE IN EAST ASIAN STUDIES

Spain

2022 - 2026

- Interdisciplinary studies focused on the languages, history, politics, economics, and societies of China, Japan, and Korea
- Specialization in Japanese society and language

Institut Bernat el Ferrer, Barcelona

ADVANCED VOCATIONAL DIPLOMA IN WEB APPLICATION DEVELOPMENT

Spain

2019 - 2021

- Development of full-stack web applications using modern frontend and backend technologies

Web Development Software Engineering

Institut Bernat el Ferrer, Barcelona

INTERMEDIATE VOCATIONAL DIPLOMA IN COMPUTER SYSTEMS AND NETWORKS

Spain

2017 - 2019

- Technical training in computer systems administration, networking, and IT infrastructure management
- Hands-on experience configuring local networks, operating systems, and cybersecurity fundamentals

Computer Systems Networking Cybersecurity

Professional Experience

Indra (Cyberdefense)

SENIOR VUEJS DEVELOPER

Barcelona, Spain

June 2026 - Present

- Developed and maintained a corporate library of reusable Vue components for internal applications.
- Developed web applications for defense operations support and information management systems.
- Implemented new features, optimized performance, and enhanced user experience in mission-critical applications.
- Collaborated with multidisciplinary teams software development best practices.

Vue JavaScript Frontend Development UI Components

Self-employed

FREELANCE SOFTWARE DEVELOPER

Barcelona, Spain

July 2023 - April 2026

- Developed business management applications and automation tools for corporate clients.
- Designed custom backend systems, workflow automation solutions, and internal management platforms tailored to specific client requirements.
- Collaborated directly with clients to analyze operational needs and deliver scalable software solutions.
- Developed full-stack applications primarily using Vue and Java for various companies, incorporating features like invoice generation and analytics.

Vue .NET Java Rust Full-Stack Development

Asolcon

SOFTWARE DEVELOPER

Barcelona, Spain

January 2022 - November

2022

- Developed business management applications using .NET technologies, including Blazor and Entity Framework, for clients such as Volkswagen and Renfe.
- Executed full-stack development tasks (frontend and backend) for corporate software solutions.
- Collaborated with the team to optimize application performance, usability, and maintainability.
- Managed client relations and handled invoice generation, analytics, CI/CD pipelines with Docker, and integrations with SAGE and third-party software.

.NET Blazor Entity Framework

BEEP

IT TECHNICIAN (INTERNSHIP)

Molins de Rei, Spain

September 2018 - March

2019

- Repaired computer equipment, diagnosed hardware issues, and maintained systems.
- Provided technical support and resolved hardware and software incidents.
- Advised clients on system configurations and computer equipment installation.

IT Support Hardware Diagnostics Maintenance

Hotel Casa Peix

WAITER / INTERNAL TOOLS DEVELOPER

Serraduy, Spain

Seasonal: July-August

2017-2021 / 2023-2025

- Provided customer service in a high-occupancy seasonal hotel environment.

- Developed internal customer management tools, improving operational efficiency and workflow organization.
- Supported daily hotel operations while identifying opportunities to optimize processes through software solutions.

Rust Customer Service Process Automation

Projects (GitHub)

Oboete

PERSONAL PROJECT

Open Source

2024 - Present

- Flashcard application for the COSMIC™ desktop environment, developed in Rust.
- Designed to offer a native Linux experience and distributed via Flathub.
- Focused on usability, performance, and efficient workflows for vocabulary learning.

Rust COSMIC Desktop Development

Clockode

PERSONAL PROJECT

Open Source

2025 - Present

- TOTP authentication client developed with Rust and Iced.
- Implemented secure token generation and account management features.
- Published on Flathub for Linux desktop users.

Rust Iced Desktop Development

Kantan

PERSONAL PROJECT

Open Source

2026 - Present

- Open-source Japanese dictionary and learning application for Android.
- Designed educational features centered around vocabulary search and language acquisition.
- Developed natively using Kotlin and Android technologies.

Kotlin Android Language Learning

Socios Peix

PROJECT

Open Source

2025 - Present

- Web application for managing members and clients within the hospitality sector.
- Implemented features for email communication, Excel exporting, and administrative workflows.
- Developed the backend system with Java (Spring) and the frontend with Vue.

Java (Spring) Vue Web Development Business Management Docker

Cedilla

PERSONAL PROJECT

Open Source

2026 - Present

- Markdown text editor for the COSMIC™ desktop environment.
- Implemented a minimalist, distraction-free interface with full Markdown editing capabilities.
- Distributed publicly via Flathub for Linux users.

Rust COSMIC Markdown Desktop Development

Delphinus

PERSONAL PROJECT

Open Source

2023 - Present

- Vocabulary generation tool for Japanese and Chinese, compatible with Anki, Quizlet, and Vaia.
- Implemented OCR support to extract vocabulary directly from images and documents.
- Developed with Rust and Go, focusing on language learning automation.

Rust Go OCR ML Web Development Self-Hosting Docker

OpenPillReminder

PERSONAL PROJECT

Open Source

2026 - Present

- Open-source contraceptive pill tracker and reminder application for Android.
- Focused on accessibility, privacy, and intuitive health tracking for the user.
- Implemented scheduling and notification systems using Kotlin.

Kotlin Android

Cocookies

PERSONAL PROJECT

Open Source

2024 - Present

- Self-hostable recipe management platform.
- Developed features for recipe organization and storage.
- Utilized local AI models to parse and import recipes from documents.

Java (Spring) Vue Web Development Self-Hosting Docker

Other

HackEPS 9th Edition

BONÀREA CHALLENGE — 2ND PLACE

Lleida, Spain

November 2025

- Secured second place in the hackathon for the challenge proposed by BonÀrea
- Developed code interfacing with a Siemens PLC using S7 and OPC protocols
- Solved various industrial automation challenges within the competition timeframe

PLC S7 OPC Industrial Automation

HackUPC 12th Edition

INDITEXTECH CHALLENGE

Barcelona, Spain

April 2026

- Solved the challenge proposed by InditexTech focused on automated warehouse systems
- Developed optimization algorithms for real-time box allocation and retrieval in a 3D grid
- Minimized shuttle travel time and improved throughput via intelligent palletization strategies

Algorithms Optimization Warehouse Automation
